SKILLS

Python

Flask framework

Docker-compose

Javascript

React.js

Linux

EDUCATION

UNIVERSITY

South Eastern Kenya
University 2015 - 2019

DEGREE NAME / MAJOR

Bachelor of Science, Geology

CERTIFICATION

Machine learning with python,
Coursera

PROFESSIONAL SUMMARY

I'm very passionate about writing code. I believe in the power of programming to transform and improve the lives of people around us and the world. With code, we have the power to make our dreams become a reality. Coding has given me a very new perspective on how things are structured and how they work together to give us results.

WORK HISTORY

- **Back End Developer**
KK VENTURES LTD, March 2020 – Present

PROJECTS COMPLETED:

1. Oasis tips/Sure tips

- Web applications that provide awesome football tips. You first get an account, then subscribe to our various subscription plans, and then access the football tips.

Website links - [oasis tips](#)
[sure tips](#)

- Currently my work at KK VENTURES LTD is to fix errors and add new features.

Technologies used:

Python flask framework, docker-compose, mpesa-daraja-api, digital- ocean hosting service.

- **Back End Developer**
MANTLE AFRICA, November 2019 – Feb 2020

PROJECTS COMPLETED:

1. Mpesa-Statement-Parser

- This is a web application that processes a Safaricom mpesa statement with the output being an organized excel format of the statement data. The data is grouped into three categories.
 - a). **Summary** – Contains a summary of transactions for money paid in and paid out into the account per month.
 - b). **Paid In** – Contains transactions for money coming in into the account.
 - c). **Withdrawn** – Contains transactions for money going out of the mpesa account.
